 535/85 Asa Place, Pracha Rat
Bamphen 15 Rd., Huai Khwang, Huai
Khwang, Bangkok 10310

Skills

- **Language :** C#, JavaScript, PHP, HTML/CSS, TypeScript
- **Game engines & Tools :** Unity engine, Unreal engine (Basic), VS Code, Visual studio
- **Framework :** Laravel, React, gRPC (MagicOnion)
- **Cloud & Database :** Unity cloud save, firebase

Education

- Bachelor of science: Digital game
Chiang Mai University, Thailand
 - College of art media and technology
 - Major Digital game
 - Second-Class Honors
 - GPAX 3.49

Experiences

- Intern Unity developer (Varisoft co.) 2025 - 2026
Mini game in ZabbWorld
 - Developed a 2D Futsal mini-game within the ZabbWorld ecosystem, featuring mechanics where players aim and shoot to score goals.
 - Utilized the Unity engine and integrated the game seamlessly with ZabbWorld's existing core framework and infrastructure for matchmaking/initialization.*2 Players mini game in ZabbWorld*
 - Engineered a 2D cooperative rhythm mini-game for ZabbWorld, allowing 2 players to play simultaneously and achieve high scores together (OSU-style gameplay featuring dynamic beat bubbles).
 - Designed and built custom Unity editor tools (Timeline-based), significantly accelerating the music charting and note-mapping workflow.*Poker multiplayer game*
 - Developed a 2D multiplayer poker game based on Texas Hold'em rules, with a strong focus on real-time multiplayer architecture.
 - Implemented MagicOnion (gRPC framework for .NET) alongside Unity to establish high-performance, low-latency data communication and state synchronization between clients.

Performance

- Education game web
 - Unity engine and C# [WebGL]
 - Dashboard [Vite + React framework]
 - Developed a WebGL-based educational mini-game focused on traditional regional dances and plays from 4 regions of Thailand, featuring 4 interactive quiz game modes.
 - Designed and integrated a cloud data storage system using Unity Cloud Save to manage and track player metrics.
 - Built a web-based administration dashboard using Vite and React to monitor and display real-time player data and statistics.
- CAMT Portal
 - Laravel framework
 - Co-developed a portal website for college staff at the College of Arts, Media, and Technology (CAMT) to assign tasks and streamline organizational workflows.
 - Implemented full CRUD functionality for comprehensive user and member management within the organization.
 - Integrated CMU OAuth for secure single sign-on (SSO) and developed a Role-Based Access Control (RBAC) system to restrict features based on staff positions.
- Don't press S (2D)
Unity engine and C# [Windows platform]
 - Unity engine and C# [Windows platform]
 - Participated in the Global Game Jam 2024 at CAMT, Chiang Mai University, serving as the Game Programmer.
 - Engineered the core game loop architecture and programmed various in-game events and logic.
 - Awarded 1st Runner-Up in the competition.
